SUMMARY

Software Engineer with experience in mobile application development and QA automation. Skilled in building scalable applications using JavaScript, React Native, and REST APIs, and developing automated testing frameworks using Playwright and Cypress with Page Object Model (POM). Strong knowledge of TypeScript, JavaScript, test automation, and software engineering principles with a focus on building reliable and high-quality software systems.

EDUCATION

- Manipal University Jaipur** 2021 – 2025
B.Tech in Computer Science (Information Technology) Patna, India
- Nardiganj College, Nardiganj** 2017 – 2019
Higher Secondary (PCM) Patna, India

EXPERIENCE

- Software Developer Engineer – SweetNest.Life** March 2025 – Present
Full Time Jaipur, India
 - Developed mobile application features using React Native and REST APIs.
 - Built automation test suites using Playwright and Cypress for validating application functionality.
 - Implemented Page Object Model (POM) architecture to design scalable test automation frameworks.
 - Automated end-to-end UI testing using JavaScript and TypeScript.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java, Python, C++

Frameworks & Technologies: Flutter, React Native, Node.js, REST APIs, JSON

QA Automation: Playwright, Cypress, Test Automation Frameworks, Page Object Model (POM), End-to-End Testing, UI Testing, Regression Testing

Databases: Firebase Firestore, SQLite, MySQL

Tools & Platforms: Git, GitHub, VS Code, Android Studio, Postman

Backend & Cloud Services Firebase (Authentication, Firestore, Cloud Messaging, Storage), REST API Integration, Cloud-based Mobile Backend

Software Engineering Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, Debugging, Code Optimization, Agile Development

PROJECTS

- Automation Testing Framework** 2025
 - Built automation framework using Playwright and Cypress with TypeScript.
 - Implemented Page Object Model (POM) for scalable UI testing.
 - Automated key workflows like authentication, navigation, and user actions..
- Echo X – AI Voice & Video Deepfake Detection System** 2025
 - Developed a deep learning-based system to detect manipulated voice and video content.
 - Built backend APIs for media upload, preprocessing, and real-time AI inference workflows.
 - Implemented confidence scoring (REAL vs FAKE), logging, and monitoring for reliability.
